PRASHANT SINGH

MERN Stack Developer

+91-7836085989 | prashantsinghrajput56@gmail.com | github.com/dev-prashant01

PROFESSIONAL SUMMARY

Skilled in React.js, Next.js, Node.js, and MongoDB, with expertise in developing dynamic survey platforms, sales automation systems, and integrating third-party APIs.

EDUCATION

- Bachelor of Technology in Mechanical Engineering | CGPA – 7.4
  J.C. Bose University of Science and Technology, YMCA Faridabad | 2018 – 2022
- XII | CGPA – 7.1
  Rawal Convent School, Ballabhgarh | 2016 – 2018

CERTIFICATION

MERN Stack Developer | Croma Campus - Noida

EXPERIENCE

Frontend Developer, Inforises Technologies (Jan, 2025 – Present)

- Working on a dynamic survey management platform designed for various domains, enabling users to create customized surveys, collect responses, and perform data analysis.
- Implemented logic-based survey flows, including conditional branching, question piping, and validation rules, enhancing user flexibility and control.
- Developed modules for real-time analytics and reporting, allowing users to visualize survey results through interactive dashboards and exportable reports

Software Developer, Loyalty Partners IT Solutions (Sep, 2023 - Oct, 2024)

- Developed software solutions, integrating Google Maps API and improve sales verification accuracy.
- Created scalable applications that cut load times by 50% and increased user satisfaction.
- Conducted data analysis that enhanced system functionalities and improved decision-making accuracy.

TECHNICAL SKILLS

- Front-end: HTML5, JavaScript, Tailwind CSS, React.js, Next.js.
- Back-end: Node.js, Express.js.
- Databases: MongoDB.

PROJECTS (PRA-SHANT.VERCEL.APP)

Saja Survey (React.js)

- Built a dynamic survey management platform with conditional logic, branching, and smart validations.
- Added data visualization dashboards for filtering, analyzing, and exporting responses.
- Designed an intuitive, responsive UI for both creators and respondents.

Sales Force Automation & Loyalty Projects

- Expense Module: Automated tracking, reducing manual entry and speeding reimbursements.
- Order Module: Improved order processing accuracy and turnaround time.
- Quotation Module: Streamlined quotation creation, boosting speed and reliability.
- Lead Module: Enhanced lead tracking, improving follow-ups and conversions.
- Event Planning Module: Automated attendee management and event workflows.
- PDF Module: Enabled backend PDF generation using Puppeteer for seamless document access.
- Product Catalogue: Enhanced search and filtering, increasing engagement and product discovery.
